This report contains the results and opinions relating to the requested polygraph examination. It may also contain statements and information of a personal nature. It is important that the information contained in this report be considered and treated as being confidential in nature.

Re: Tyrone L. Noling
SSN: 280-68-4694

At your request a polygraph examination was conducted with the above listed Mr. Noling, regarding a robbery / double homicide which occurred in Portage County, Ohio, with the victims last name known as the Hertigs.

Mr. Noling was advised that he could not be compelled to submit to this examination and that he had the right to terminate the examination at any time he so desired. Mr. Noling stated he was willing to submit to this examination and read and signed a release and agreement form regarding this examination.

During the pretest interview all questions to be asked during the testing phase of the examination were reviewed with Mr. Noling. Furthermore it was made clear that Mr. Noling understood the meaning of each question. The You Phase testing format was employed for this examination that is the relevant examination questions were designed to detect if direct involvement in the homicides, by Mr. Noling exists.

During the actual testing phase of this examination Mr. Noling was asked the following relevant examination questions:

39. Regarding whether or not you were involved in the murder of the people now known by you, as the Hertigs, Do you intend to answer truthfully each question about that?
33. Did you shoot a gun, at the people, known by you as the Hertigs, which caused their murders?
35. Did you shoot a gun which caused the murder of either of the persons now known by you as the Hertigs?
37. Before the Detectives questioned you about the murders of the Hertigs, did you already know about those murders?

Mr. Noling responded to the above listed relevant examination questions as follows:

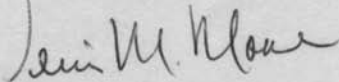

39. Yes
33. No
35. No
37. No

A total of two polygraph charts were conducted for this examination.

Conclusions:

After careful review of the polygraph charts for this examination, it is the examiner's opinion that the examinee was responding truthfully to all of the relevant examination questions.

Respectfully submitted,

Dennis M. Moore
Examiner
